

Mina Lotfy Saad

.NET Backend Developer

Alexandria, Egypt | +20 1208040804 | minalotfysaad@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

.NET Backend Developer experienced in building secure and scalable RESTful APIs using C#, ASP.NET Core, Entity Framework Core, and SQL Server. Hands-on experience developing maintainable backend systems with Clean Architecture, SOLID principles, JWT authentication, role-based authorization, Redis caching, validation, and automated testing.

PROFESSIONAL EXPERIENCE

.NET Backend Developer | *Vetanoia Solutions* | *Alexandria, Egypt* | November 2025 – June 2026

- Developed RESTful APIs with ASP.NET Core Web API to support business workflows and client-facing features.
- Implemented JWT authentication, ASP.NET Core Identity, and role-based authorization to secure API access.
- Optimized Entity Framework Core queries and SQL Server operations to improve data access efficiency.
- Applied Clean Architecture and SOLID principles to keep backend components modular and maintainable.
- Collaborated with senior developers using Git/GitHub and maintained API documentation with Swagger.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, TypeScript

Backend: ASP.NET Core, .NET, Web API, REST APIs, ASP.NET Core Identity, JWT

Architecture: Clean Architecture, SOLID, Repository Pattern, Unit of Work, Specification Pattern, Dependency Injection

Data: Entity Framework Core, SQL Server, LINQ, Redis

Quality & Testing: FluentValidation, AutoMapper, xUnit, Moq, Structured Logging, Exception Handling

Tools: Git, GitHub, Visual Studio, Postman, GitHub Actions, Swagger/OpenAPI

AI-Assisted Development: Claude, Codex, AI coding agents

FEATURED PROJECTS

Employee Leave Management System | [GitHub Repository](#)

- Built a production-style HR backend for leave requests, departments, balances, and Employee/Manager/HR approval workflows.
- Implemented authentication, role-based authorization, validation, pagination, filtering/search, centralized exception handling, structured logging, and Swagger documentation.
- Applied Clean Architecture, SOLID, Repository/Unit of Work patterns, and automated testing for maintainable business logic.

E-Commerce API | [GitHub Repository](#)

- Built a RESTful e-commerce backend covering products, baskets, orders, and online payment workflows with Stripe and JWT.
- Implemented Redis caching and the Specification Pattern for frequently accessed data, filtering, sorting, and pagination.
- Applied Onion Architecture to separate business logic from infrastructure and support maintainable feature development.

CompetitionsHub API | [GitHub Repository](#)

- Developed competition, contestant, question, grading, leaderboard, and result workflows with secure Admin/Contestant roles.
- Implemented manual/automatic scoring and a normalized SQL Server data model using EF Core.

EDUCATION

Web Development Diploma (.NET Full Stack) | **Route IT Training Center** | 2024 – 2025

Bachelor of Engineering | **Faculty of Engineering, Alexandria University** | 2018 – 2025

LANGUAGES

Arabic — Native | **English** — Professional Working Proficiency | **German** — Intermediate

ADDITIONAL INFORMATION

Military Status: Exempted from Military Service | **Willing to Relocate:** Yes
